REQUISIÇÃO DE CHAPAS

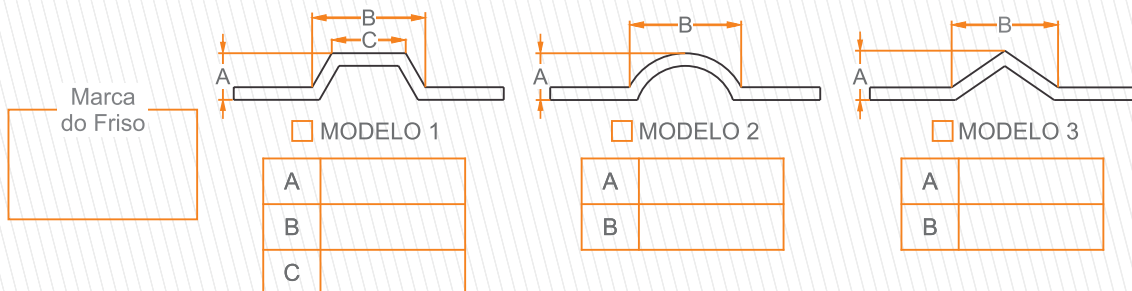

Cliente:	Vendedor:
Responsável:	Data:

Como Definir a sua Chapa

Qtd. Chapas	Largura da Chapa	Nº de Frisos	Passo	Tipo de Chapa <input type="checkbox"/> Chapa Branca <input type="checkbox"/> Chapa Fosca	Espessura da Chapa <input type="checkbox"/> 0,70 mm <input type="checkbox"/> 0,80 mm
-------------	------------------	--------------	-------	--	--

OBS: 1ª - Friso é a região na Chapa que tem um ressalto. Existem diversos tipos de Frisos, veja como medir cada um deles:

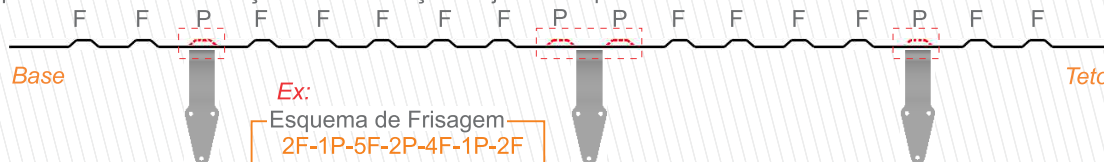

2ª - Passo é a distância do centro de um Friso a outro. Para cada tipo de Friso existe um forma de medir seu passo. Veja como medir para cada caso:

Como Definir a sua Chapa para Portas

Para definir chapas de portas, deve-se seguir o procedimento anterior e nas regiões onde têm dobradiças, deve-se informar quantos Frisos (de 1 a 3) serão "pulados", ou seja, quantos frisos não devem ser feitos para a melhor acomodação das dobradiças. Veja o exemplo

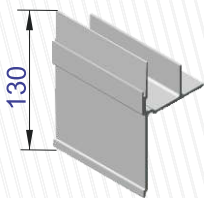

O esquema está dizendo: Frisa 2 e Pula 1, Frisa 5 e Pula 2, Frisa 4 e Pula 1, Frisa 2.
